ABSTRACT

Average salary increases for 1,506 faculty in the field of special education are reported for 1984-1985 and 1987-1988, as part of the College and University Personnel Association's annual faculty salary studies. Included are comparative data for 160,596 faculty at 216 public colleges and 266 private colleges, representing 45 academic disciplines. In 1984, 95 public colleges and 34 private colleges reported on special education faculty salaries, while 86 public and 38 private colleges reported in 1987. In 1987-88, the faculty salary factor in this field was approximately equal to, in the public colleges, and 11% below, in the private colleges, the overall average faculty salary of the other 44 disciplines/major fields. The average salary for the field in the private colleges was 6.2% lower than in the public colleges in 1984-85. In 1987-88, the average salary in the private colleges was 10% lower than in the public colleges. Included is information on: the number of faculty by academic rank, including new assistant professors; salaries by academic rank; the ratio of average salaries to total salaries of all institutions in both years; comparisons with the Consumer Price Index of changes in cost-of-living for both years; and comparisons with 44 other disciplines. The disciplines and participating institutions are listed. (KM)

SALARY TREND STUDY OF FACULTY IN SPECIAL EDUCATION (GENERAL) FOR THE YEARS 1984-85 AND 1987-88

Richard D. Howe and Judith Jones

Since 1982-83 the College and University Personnel Association (CUPA) in Washington, D.C., in cooperation with Appalachian State University in Boone, North Carolina, has conducted annual national faculty salary studies by discipline and rank each year through 1987-88. Each year two separate studies are conducted, one for public senior colleges and universities which are members of the American Association of State Colleges and Universities (AASCU) in Washington, D.C., and the other for private senior colleges and universities. The list of private institutions is provided by the American Council on Education in Washington, D.C.

Salary data for each study were collected and tabulated for full-time teaching faculty in 45 selected academic disciplines including special education. The disciplines were chosen from among those defined by the Higher Education General Information Study (HEGIS) Taxonomy and by A Classification of Instructional Programs (CIP), 1985. The definition of the discipline/major field of special education in the CIP is as follows:

> A group of instructional programs that describe the theories, methods, and techniques of designing, implementing, and evaluating organized learning activities for students whose physical, emotional, mental, or social needs require a special curriculum and educational setting.*
>
> [*Gerald S. Malitz, A Classification of Instructional Programs (Washington, DC.: National Center for Education Statistics, [1985], p. 68.--13.10.]

This article presents a summary of the overall average salary increases in the discipline/major field of special education from the "baseline year" of 1984-85 to and including the "trend year" of 1987-88 for both public and

HE 022 072

private institutions. Of the 272 institutions which participated in CUPA's PUBLIC (AASCU) study of 1984-85, 216 also participated in 1987-88. Data from those same 216 institutions were used in both the "baseline year" and the "trend year". Of the 451 institutions which participated in CUPA'S PRIVATE study of 1984-85, 266 also participated in 1987-88. Data from those same 266 institutions were used in both the "baseline year" and the "trend year".

This study lists the average salaries of special education faculty for both public and private participating institutions by rank, including "new assistant professor," the FAC MIX PCT (faculty mix percentage) and the salary factor. In addition, comparisons are made with the CPI (Consumer Price Index) of changes in cost-of-living between the two studies for each of the two study years (1984-85 and 1987-88).

The CPI is based on prices of food, clothing, shelter and fuels, transportation, medical care, entertainment, and other goods and services that people buy for day-to-day living. In examining trends in faculty salary it is important to consider any changes in the economy. Thus, by comparing changes in faculty salaries with the CPI, a more prcise representation of the "real" salary increases is yielded.

The salary is based on a nine- or ten-month academic year salary of full-time faculty only. Full-time faculty are those who teach no less than 51 percent of the time. Salary for summer academic work, fringe benefits, and perquisites are not included in the salary data. The average salary displayed is computed from all faculty salaries reported for a given rank and discipline.

The "NUM" means the number of faculty members whose salaries were included to compute the average salary.

The "N/IN" means the number of institutions that reported salary data for a given academic rank and discipline/major field.

The FAC MIX PCT is the percentage of faculty in a given discipline/major field who hold a given academic rank. For example, a FAC MIX PCT factor of .34 for associate professor of special education in the 1984-85 public study means that 34 percent of the faculty in that discipline/major field hold the rank of associate professor.

The SALARY FACTOR for a given rank of a given discipline/major field is the ratio of the average salary to the total average salary of all institutions in each of the four studies: PUBLIC 1984-85, PUBLIC 1987-88, PRIVATE 1984-85 and PRIVATE 1987-88. For example, a SALARY FACTOR of 0.96 for assistant professors in the discipline/major field of special education in the 1984-85 public study means that their salaries are 4 percent lower than the average of all assistant professors in all institutions in that study.

NEW ASST PROF is the grouping of assistant professors who were hired for the first time in the fall of the study year (1984-85 or 1987-88). All information for this group was included in the ASST PROF group for reporting purposes. This group is used mainly for new hiring information.

ALL MAJOR FIELDS is the entire data base for all 45 disciplines/major fields in each of the four studies. It is used to compare, among other things, the discipline/major field of special education with the entire data base for each study.

Of particular import to the reader is noting the size of the sample on which each percentage or dollar value is based. The smaller the number in the group, the greater the effect of extreme scores on a descriptive statistic such as the average. It should be noted also that any large disparity in the sample sizes between the "baseline year" of 1984-85 and the "trend year" of 1987-88 will lessen the reliability and validity of any conclusions that one might make based on a simple comparison of averages.

RESULTS OF THE TWO PUBLIC (AASCU) STUDIES, 1984-85 AND 1987-88

In the PUBLIC 1984-85 salary study in the above table, the reader may note that the discipline/major field of special education was reported in 95 of the 216 public (AASCU) institutions. The average salary of the 707 faculty was $28,691. This average salary was approximately 2 percent (0.98) lower than the average salary of $29,234 for all 50,311 faculty in ALL MAJOR FIELDS in the 1984-85 public study.

In the PUBLIC 1987-88 salary study in the above table, the discipline/major field of special education was reported in 86 of the same 216 public (AASCU) institutions. The average salary of the 583 faculty was $34,442. This average salary was approximately the same as (1.00) the average salary of $34,581 for all 51,570 faculty in ALL MAJOR FIELDS in the 1987-88 public study.

The increase in average salaries for all faculty in special education after three years in the public institutions studied was 20.0 percent ($34,442 minus $28,691 equals $5,751). The CPI of increased cost-of-living between October 1984 and October 1987 was 9.5 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 10.5 percent or an average of 3.5 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the public institutions studied was 18.3 percent ($34,581 minus $29,234 equals $5,347). In comparison to the discipline/major field of special education (20.0%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 1.7 percent (20.0% minus 18.3% equals 1.7%) less than faculty in the discipline/major field of special education.

The reader may note that the faculty mix percentages in special education are higher at the professor rank than at the assistant professor rank in both public studies. The faculty mix percentage of professor and assistant

professor are 0.32 and 0.29 (1984-85) respectively; and 0.37 and 0.26 (1987-88) respectively. The differences in the ranks of professor and assistant professor in ALL MAJOR FIELDS for both public studies are 0.33 and 0.27 (1984-85) and 0.35 and 0.28 (1987-88), respectively. In other words ALL MAJOR FIELDS has a higher percentage of full and a lower percentage of assistant proffessors when compared to special education in the 1984-85 public study. However, the opposite is true in the 1987-88 public study.

Finally, the hiring rate of new assistant professors in special education in the 1984-85 public study was higher compared to that of ALL MAJOR FIELDS: 4.2 percent (30/707) vs. 3.8 percent (1,931/50,311), respectively. In 1987-88, however, the hiring rate of new assistant professors in special education was lower than that of ALL MAJOR FIELDS: 4.1 percent (24/583) vs. 4.4 percent (2,245/51,570), respectively.

RESULTS OF THE TWO PRIVATE STUDIES, 1984-85 AND 1987-88

In the PRIVATE 1984-85 salary study in the above table, the reader may note that the discipline/major field of special education was reported in 34 of the 266 private institutions. The average salary of the 107 faculty was $27,006. This average salary was approximately 9 percent (0.91) lower than the average salary of $29,769 for all 28,991 faculty in ALL MAJOR FIELDS in the 1984-85 private study.

In the PRIVATE 1987-88 salary study in the above table, the major field of special education was reported in 38 of the same 266 private institutions. The average salary of the 109 faculty was $31,265. This average salary was approximately 11 percent (0.89) lower than the average of $35,269 for all 29,724 faculty in ALL MAJOR FIELDS in the 1987-88 private study.

The increase in average salaries for all faculty in special education after

three years in the private institutions studied was 15.8 percent ($31,265 minus $27,006 equals $4,259). The CPI of increased cost-of-living between October 1984 and October 1987 was 9.5 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 6.3 percent or 2.1 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the private institutions studied was 18.5 percent ($35,269 minus $29,769 equals $5,500). In comparison to the discipline/major field of special education (15.8%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 2.7 percent (18.5% minus 15.8% equals 2.7%) more than faculty in the discipline/major field of special education.

The reader may note that in the field of special education, the faculty mix percentage is rather uniform between professor and assistant professor ranks in the private studies: 0.24 vs. 0.25 (1984-85), respectively; and 0.27 vs. 0.28 (1987-88), respectively. These proportions are slightly smaller than the FAC MIX PCT at the same ranks for ALL MAJOR FIELDS in both private studies: 0.33 vs 0.30 (1984-85), respectively; and 0.33 vs 0.30 (1987-88), respectively. In other words ALL MAJOR FIELDS has a higher percentage of professors and assistant professors compared to special education in both private studies.

Finally, the reader may note that the hiring rate of new assistant professors in special education in the private studies was less than the hiring rate in ALL MAJOR FIELDS in 1984-85: 1.9 percent (2/107) vs. 4.2 percent (1,224/28,991), respectively; whereas in 1987-88, it was greater: 7.3 percent (8/109) vs. 4.4 percent (1,322/29,724), respectively. In other words the hiring rate in the discipline/major field of special education was less than that for ALL MAJOR FIELDS in 1984-85, and greater in 1987-88.

CONCLUDING REMARKS

This article presented salary-trend information on the academic discipline/major field of special education and compared that information with 44 other academic disciplines/major fields over a period of three years: the "baseline year" of 1984-85 through the "trend year" of 1987-88. Two studies, one for public (AASCU) institutions, and the other for private institutions were conducted for the baseline year and for the trend year--a total of four studies. A total of 1,506 faculty in the discipline/major field of special education participated and were included in the overall total of 160,596 faculty in all 45 disciplines/major fields in all four studies. The same 216 public (AASCU) institutions and the same 266 private institutions in the United States participated in the baseline year and the trend year.

Although many interpolations and extrapolations of the data may be made, a few of the more important ones are as follows. First, the faculty salary factor in the discipline/major field of special education is currently (1987-88) some equal to and 11 percent lower in the public and private institutions, respectively, than the overall average faculty salary of the other 44 disciplines/major fields. The average faculty salary for special education in the private institutions was considerably lower (6.2%) in comparison to that in the public institutions in 1984-85. The average faculty salary in the private institutions is now (1987-88), 10 percent less compared to that for the public institutions.

Second, the CPI of October 1987, in comparison to the CPI of October 1984, indicates that the faculty in special education, in both the public and private institutions, received overall salary increases for three years above the cost-of-living. The salary increase of special education faculty in the public institutions was ahead and private institutions lagged behind ALL MAJOR FIELDS

during this same period. Special education faculty in the private institutions have some catching up to do in salary in comparison with faculty in ALL MAJOR FIELDS and their colleagues in the public institutions.

Third, in 1987-88 the discipline/major field of special education has a lower percentage at the assistant professor rank compared to the full professor rank in the public institutions, but higher at the assistant professor rank than the full professor rank in the private institutions. The professor rank appears to be increasing nore rapidly in the public institutions. It seems a larger percentage of new assistant professors are being hired in the private institutions.

Now that a rather significant data base on individual faculty member salaries has been developed, it is anticipated that additional salary-trend studies will be effected in special education, and in other disciplines/major fields, on an annual basis.

Richard D. Howe is the originator and director of the annual CUPA faculty salary studies. He is a professor of leadership and higher education, and history at Appalachian State University, Boone, North Carolina. Co-author Judith Jones is Director of Equal Opportunity/Affirmative action at Virginia Polytechnic Institute and State University, Blackburgs, Virginia
